

Simple painting for small and medium projects around the home and garden.

Introduction

The DIY SprayStation® has been designed specifically for first time users, no previous painting or spraying skills are required. This entry level product is a cost effective solution for those small paint jobs around the home and garden.

No need to waste time and effort with clumsy rollers and dripping brushes, it can spray many different surfaces and uses less material in the process. It gives smooth fantastic results time and time again; providing a superb, professional finish for even the most inexperienced user. It helps tackle those tricky jobs such as stair spindles, corners, radiators and gives a great finish to doors and walls with no drips or brush marks.

The spray gun pattern lever at the front of the gun allows you to vary the spray pattern progressively between horizontal, vertical and round. This simple adjustment allows you to change the pattern to suit your specific project; round is ideal for fine and detailed jobs on furniture or radiators, whereas the horizontal or vertical options are great for larger areas when spraying walls and fences. On the back of the gun there is a quick to adjust paint flow dial so you can be in constant control and alter how fast you are spraying, with minimal overspray.

The DIY SprayStation® is supplied with two needles; a 2.5mm needle for larger projects and a 1.5mm needle for detail work. The 1 litre spray pot is easy to refill and clean after use. Accompanied by a quick to grab carry handle and 2.7m hose, it allows you to move around and spray freely for any project providing a flawless finish every time.
